## Empire AX for Microsoft Dynamics™ AX

IT Organizations  
and Professional Services

Version 7.2

Increase your profitability and completion of successful projects by managing the financial aspects of your project-oriented organization with Empire AX. Empire AX for Microsoft Dynamics™ AX will help you increase employee and contractor profitability, improve the management of your project teams, add new client services and accelerate your invoice processing. Seamless integration of client and project-related information helps you control your overall project-related costs

---

## BENEFITS SUMMARY

- Seamless, out-of-the-box integration of financial, resource, client and project information between Microsoft Dynamics™ AX and the Empire SUITE
- Use your project data to provide valuable information
- Improve your management of scarce resource time and effort
- Tight control of internal business processes
- Accelerate your invoice processing

## **INTEGRATION OF FINANCIAL, RESOURCE AND PROJECT INFORMATION**

Connect your business software systems to integrate data and streamline company and project-related processes. Reduce redundant data entry, improve accuracy and increase employee productivity by integrating your project related data with Microsoft Dynamics AX's general ledger, purchasing, and receivables modules. Streamline your financial processes by implementing automatic posting of invoices and employee and vendor expenses. Benefit from tight integration with familiar productivity software, including Microsoft Office Project 2003 & 2007, Microsoft Office Project Server 2007 and Microsoft Outlook.

## **USE YOUR PROJECT AND BUSINESS DATA TO PROVIDE VALUABLE INFORMATION**

Gather and analyze client, project and task information to gain valuable business insight, and use that information to manage your business more effectively. View client, contract, and project management details in real time for an up to the minute overview of project progress and profitability. Stay on top of project details to avoid budget and cost overruns. Manage critical estimate to complete information at the detail level.

## **MANAGE YOUR TEAM'S TIME AND EFFORT**

Our Web-based interface gives your team customizable portals for access to critical project information. Message center and email functionality gives your resources the tools they need to stay informed and to keep management informed. Our dashboard capability gives management the reporting tools needed to monitor a portfolio at a glance, and to identify projects in trouble while there is still time to make the necessary changes.

## **CONTROL INTERNAL BUSINESS PROCESSES**

Take control of your company's financial and operational processes by ensuring your processes adhere to industry best practices, client standards, and government regulations. Centralize the management of and provide access to critical company and project information. Define accounting and reporting structures that meet your specific business requirements. Track and analyze transactions across your entire business – including multi-national operations - and drill down to the details you need to manage your projects efficiently and effectively.

WSG developed a custom solution for the Microsoft Dynamics™ AX application platform. Our solution automates the capture, management, analysis and reporting of client and project-related information. Streamlined functionality provides an all-inclusive software solution that allows you to accelerate your business by transforming the way your organization performs its most critical functions:

- Increase productivity with tightly integrated applications from project initiation and budgeting to resource utilization and analysis.
- Gain real-time access and insight into critical business information and trends.
- Maintain tight control of processes and information with centralized management of operational processes, project accounting structures and shared information.
- Improve cash flow with accelerated invoicing and reduced administrative costs.
- Optimize profits with streamlined operations and improved management visibility across project lifecycles.
