

## Empire PROJECT for Microsoft Office Project 2007

### BENEFITS SUMMARY:

- Integration of financial, resource, project and task information
- Use your project data to provide valuable information
- Better management of your team's time and effort
- Accelerate billing and invoicing time

Increase your profitability and offer increased client service that sets you apart from the competition by managing complex project management details for your project-oriented organization. Empire PROJECT for Microsoft Office Project Server 2007™ can help you increase employee productivity, improve management of your project teams, add new client service capabilities and accelerate your invoice processing. Tight integration of client and project-related information between Empire PROJECT and Microsoft Office Project Server 2007™ helps you control your costs.

*Simple one time integration screen for automated integration with either Microsoft Project Professional MPP format or to Microsoft Office Project 2007 server.*

### Integration of financial, resource, project and task information

Connect your business software systems to integrate data and streamline project-related processes. Reduce redundant data entry, improve accuracy and increase project manager productivity by integrating your project related data. Streamline project results analysis by implementing automatic posting of actual employee time sheet data back to MPP format or to Office Project 2007 server.

### Gain insight into project and business data

Gather and analyze client, project and task information to gain valuable business insight, and use that information to manage your business more effectively. View client, contract, and project management details in real time for an up to the minute overview of project progress and profitability. Stay on top of project details to avoid budget and cost overruns. Manage critical estimate to complete information at the detail level.

### Manage your team's time and effort

Our Web-based interface gives your team customizable portals for access to critical project information. Message center and email functionality gives your resources the tools they need to stay informed and to keep management informed. Our dashboard capability gives management the reporting tools needed to monitor a portfolio at a glance, and to identify projects in trouble while there is still time to make the necessary changes.

### Control billing and invoicing time

Take control of your company's financial and operational processes by ensuring your processes adhere to industry best practices, client standards, and government regulations. Centralize the management of and provide access to critical company and project information. Track and analyze transactions across your entire business and drill down to the details you need to manage your projects efficiently and effectively.

WSG developed a custom solution for the Microsoft Office Project Server 2007™ platform. Our solution automates the integration of project details into a global project accounting system. Streamlined functionality provides an all-inclusive software solution that allows you to accelerate your business by transforming the way your organization performs its most critical functions:

- Increase productivity with tightly integrated applications from project initiation and budgeting to resource utilization and analysis.
- Gain real-time access and insight into critical business information and trends.
- Maintain tight control of processes and information with centralized management of operational processes, project accounting structures and shared information.
- Improve cash flow with accelerated billing, client invoicing and reduced administrative costs.
- Optimize profits with streamlined operations and improved management visibility across project lifecycles.

### Features Overview:

<b>Microsoft Project Bi-Directional Integration with Project Accounting</b>	Two-way integration between Empire PROJECT and Project (and Project Server 2007) offers increased team collaboration capabilities, ease of use for project based planning and updated project results as timesheets are approved. Integration with Empire RESOURCE gives your project managers access to resource planning tools to ensure that the appropriate resources – properly skilled, located and available – are assigned to your projects.
<b>Flexible Project Management Capabilities</b>	Configure project workflow and work structures to meet your business requirements; define rates for revenue and cost specific to the client, project or resource; and establish billing rules and revenue recognition methods.
<b>Detailed Job Analysis</b>	Accumulate costs and analyze projects with drill-down capabilities at any level. Robust planning, scheduling and reporting functionality allows you to assign resources and report at the appropriate level of detail.
<b>Project Templates</b>	Customer and project details allow you to create client-specific project billing, cost and expense rates. Archive and retrieve historical staffing plans, estimates, purchase orders, invoices, and budget reconciliations.
<b>Web-Based, Workflow-Enabled Time and Expense Entry</b>	Maintain tight control over costs and shorten billing cycle time with automated approval processes for timesheets. Management portals indicate when time is not entered as required or when scheduled and committed costs exceed budgets.
<b>Resource Planning and Scheduling with Empire RESOURCE</b>	Empire RESOURCE is a powerful resource scheduling, planning, forecasting and tracking tool. Your company can improve cost efficiencies by better managing the allocation of resources against your projects.
