Total			10.50	11.00	8.50	9.00	10.00	5.00	0.00	54.00

Gain valuable insight into your project and business data

Gather and analyze client, project, resource and task information to gain valuable business insight, and use that information to manage your business more effectively. View client, contract, and project management details in real time for an up to the minute overview of project progress and profitability. Stay on top of project details to avoid budget and cost overruns. Manage critical estimate to complete information at the detail level.

Manage your team's time and effort

Our Web-based resourcing interface gives your team customizable portals for access to critical staff and project information. Message center and email functionality gives your employees the tools they need to stay informed and to keep management informed. Our dashboard capability gives management the reporting tools they need to monitor a portfolio at a glance, and to identify projects in trouble while there is still time to make the necessary changes.

Control internal business processes

Take control of your company's financial and operational processes by ensuring your processes adhere to industry best practices, client standards, and government regulations. Centralize the management of and provide access to critical company and project information. Define accounting and reporting structures that meet your specific business requirements. Track and analyze transactions across your entire business – including multi-national operations - and drill down to the details you need to manage your projects efficiently and effectively.

Our solution automates the capture, management, analysis and reporting of client and project-related information. Streamlined functionality provides an all-inclusive software solution that allows you to accelerate your business by transforming the way your organization performs its most critical functions:

- Increase your productivity from project initiation and budgeting through resource utilization and post project analysis through our intuitive and tightly integrated Web-based applications.
- Gain real-time access and insight into critical business information and trends.
- Maintain tight control of processes and information with centralized management of operational processes, project accounting structures and shared information.
- Improve cash flow with accelerated invoicing and reduced administrative costs.
- Optimize profits with streamlined operations and improved management visibility across project lifecycles.

Features Overview:

Flexible Project Management Capabilities	Configure project workflow and work structures to meet your business requirements; define rates for revenue and cost specific to the client, project or resource; and establish billing rules and revenue recognition methods. Use our resourcing tools to find the right resources for your projects: properly skilled, correctly priced and appropriately located.
Detailed Job Analysis	Accumulate costs and analyze projects with drill-down capabilities at any level. Robust planning, scheduling and reporting functionality allows you to assign resources and report at the appropriate level of detail.
Customer and Project Profiles and Templates	Customer and project details allow you to create client-specific project billing, cost and expense rates. Archive and retrieve historical staffing plans, estimates, purchase orders, invoices, and budget reconciliations.
Web-Based, Workflow-Enabled Time and Expense Entry	Maintain tight control over costs and shorten billing cycle time with automated approval processes for timesheets. Management portals indicate when time is not entered as required or when schedules and committed costs exceed budgets.
Customizable Revenue Recognition and Project Billing Rules	Define revenue recognition at the company, customer, project, or activity level. Pre-configure rules for percent complete, completed contract, time and materials, and fixed fee projects with tools that conform to the way your company works. Flexible billing parameters support retainer, time and materials, milestone and progress billing.
Multicompany and Multicurrency Support	Your business can manage cost centers, departments, offices and companies and apply inter-company rules within one database. Track financial transactions within and between different cost centers, departments and subsidiaries to help ensure an accurate overview of revenue and cost. Full multi-currency support enables you to perform currency translations associated with project budgeting, costing, billing, accounting, and reporting.
Powerful Resource Planning and Scheduling with Empire RESOURCE	Empire RESOURCE is a powerful resource scheduling, planning, forecasting and tracking tool. Your company can improve profitability and productivity by better managing the allocation of resources across all the organization's projects.
Microsoft Project Bi-Directional Integration with Project Accounting	Two-way integration between Microsoft Office Project (and Project Server 2007) offers increased team collaboration capabilities, ease of use for project based planning and updated project results as timesheets are approved. Integration with Empire RESOURCE gives your project managers access to resource planning tools to ensure that the appropriate resources – properly skilled, located and available – are assigned to your projects.
Project Accounting Integration with ERP Applications	Your business will benefit the most when you are able to connect and integrate Empire TIME with your existing ERP application software, such as SAP, Microsoft Dynamics GP or Peoplesoft. Empire TIME offers out of the box integration with Microsoft Dynamics AX.
