

Enterprise Software for Organizations with Global Supply Chains

Facing increasing competition and strict customer demands, many organizations have established a global supply chain to help reduce product costs while maintaining their margins. These businesses are now being forced to manage complex networks of suppliers and other business partners in order to quickly and profitably bring their products to market.

Systems Advisors Group offers industry-leading software applications and end-to-end software implementation services to help organizations manage their global supply chain, in order to increase efficiencies, enhance customer satisfaction, and improve overall profitability.

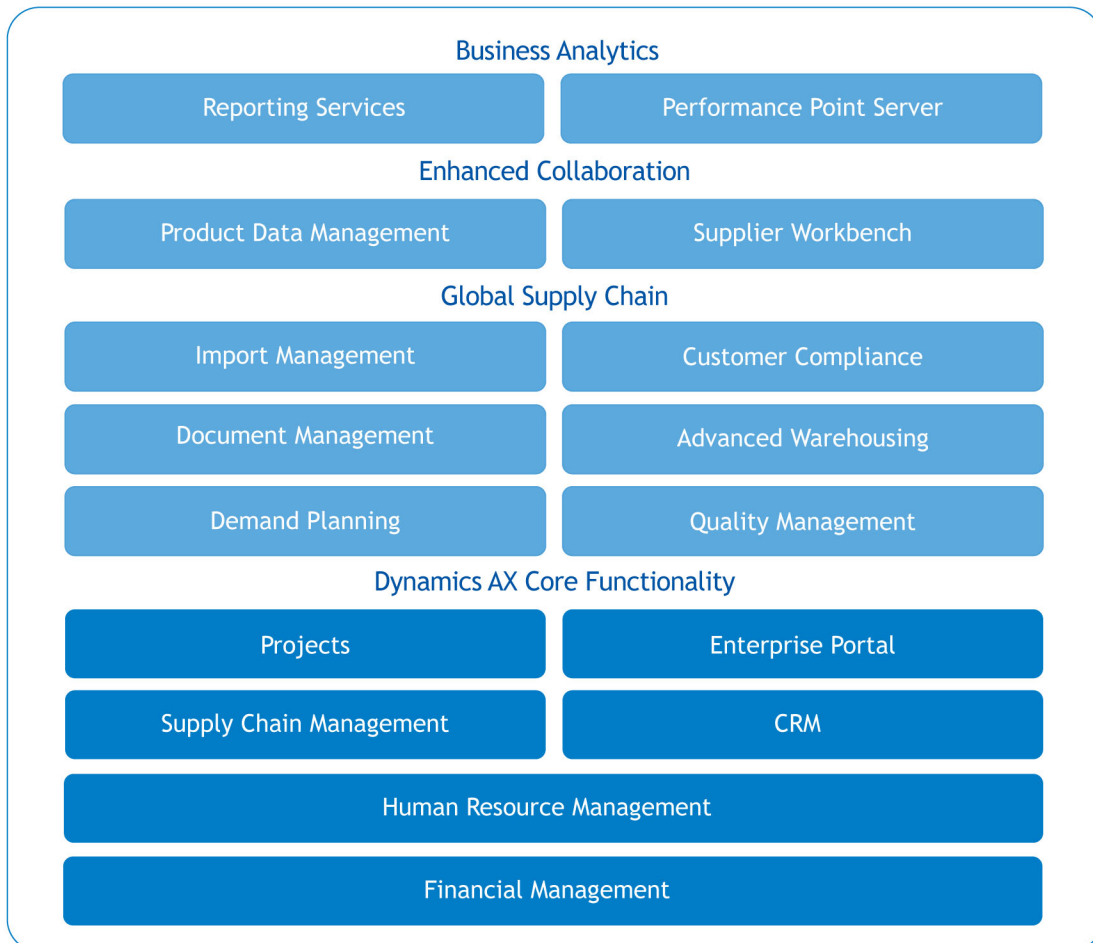

Our Global Supply Chain solution combines the power of Microsoft's Dynamics™ AX ERP system with unique functionality developed

specifically for import distribution companies or organizations leveraging offshore manufacturing models.

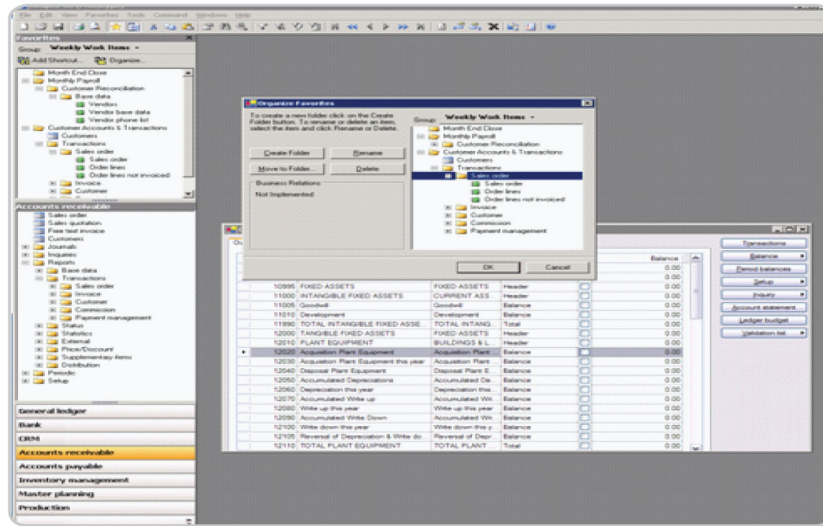

Global Supply Chain Industries

- Consumer packaged goods
- Household products
- Apparel
- Electronics
- Industrial Goods

Solution Map

Microsoft Dynamics™ AX is Microsoft’s flagship enterprise software solution. Dynamics™ AX is built on Microsoft’s industry standard technology stack, so it works like and works with the Microsoft tools that you already use. And because these Microsoft technologies are built to work together, you realize a low Total Cost of Ownership and simplified IT administration.

Microsoft Dynamics™ AX has a familiar Outlook-style user interface

Systems Advisors Group has augmented Microsoft Dynamics™ AX with features that meet the unique requirements of companies with global supply chains. These enhancements include tools for advanced import management, product data management, supplier collaboration, demand planning, and customer compliance initiatives. And because Microsoft Dynamics™ AX is highly flexible, it can help you rapidly adapt to any changes in your business environment.

Customer Compliance Features

- EDI and Electronic Document Delivery
- Advanced Shipment Notifications (ASN)
- Labeling and UPC Management
- RFID
- Claims, Allowances, and Chargebacks

Advanced Import Management Features

- Container Management and Tracking
- Data and Document Management for Customs, Duties, Brokers,
- Direct Import and Drop Ships
- Landed Cost Analysis
