

The SAG Partner AdvantEDGE Program

The SAG Partner AdvantEDGE Program is a global service and support program for all Microsoft Dynamics partners to help them provide their customers with superior quality of services on a global scale and become more competitive at the same time.

Most Microsoft partners find it difficult to scale up their business, become more competitive and provide quality services to their customers. The SAG Partner AdvantEDGE Program is specifically designed to allow Microsoft partners to focus on business development and provide par excellence services to customers, allowing them to lower their bottomline at the same time.

The SAG Partner AdvantEDGE Program provides partners with an opportunity to utilise the services of a team of professionals who have been in the industry for over 18 years, have worked across 50 countries on various Microsoft Dynamics projects and have been involved in the core development and support services for Microsoft themselves.

“Providing customers the ability to develop across the globe in tandem and according to Microsoft standards...”

Experience & Knowledge

SAG Partner AdvantEDGE India has been providing Outsourced Development services exclusively on Microsoft Dynamics products since 2000 for different Localisation projects undertaken by the Microsoft GDL team.

Latin American countries, European countries, Brazil, India & APAC are the few of the many localisations that we have developed and maintained for Microsoft.

We host a team of over 130+ software development professionals who have experience Microsoft Dynamics products. With 100% certification on Microsoft dynamics AX, we come with a vast amount of knowledge and industry experience.

Our development team is capable of taking up any challenges around Microsoft Dynamics. We follow Microsoft methodologies & best practices defined by Microsoft on all our projects. This ensures that your product gets to market faster through our mature application development & management process.

We are recognised as Localisation and Globalisation specialists in the industry. With our global presence & knowledge, we are able to understand the global and local needs around Microsoft Dynamics products around different geographies. We have specialist knowledge and extensive experience with Microsoft Dynamics products version upgrades. We have done a number of upgrade projects including Microsoft Dynamics AX 2009.

We understand the problems that can occur in relation to systems integration and offer both customisations of existing integration elements and custom-made system integration solutions.

“This is an absolutely critical project to enable us to accelerate competitive progress on Microsoft Dynamics AX in India. Thanks to all for the passion and push here!”

David Dennis

Key Work by Development Team

Some of the major localisation releases that the team here has developed, reengineered, tested on Microsoft Dynamics AX are:

- Brazil localisation for Microsoft Dynamics AX 3.0, 4.0 and feature packs
- Japan localisation AX 4.0
- Thailand localisation Microsoft Dynamics AX 4.0 & 2009
- India - Microsoft Dynamics AX 3.0 SP5, AX 3.0 SP6 and AX 4.01 releases
- India - Microsoft Dynamics AX 4.0 SP2 release with the new tax engine - complete rewrite
- Microsoft Dynamics AX 2009 and GLS Consolidation development work on Indian Localisation and other GLS Countries is currently in progress
- Spain regulatory features
- UK regulatory features
- Hungary & Czech Republic regulatory features
- India regulatory features
- Sustained Engineering for India, Japan, Thailand, New Zealand, Australia and Eastern European countries including Russia on Microsoft Dynamics AX

We have developed the following Product Migration tools for Microsoft, currently being evaluated and implemented at Poland to help migrate Microsoft Dynamics GP customers to Microsoft Dynamics NAV / Microsoft Dynamics AX.

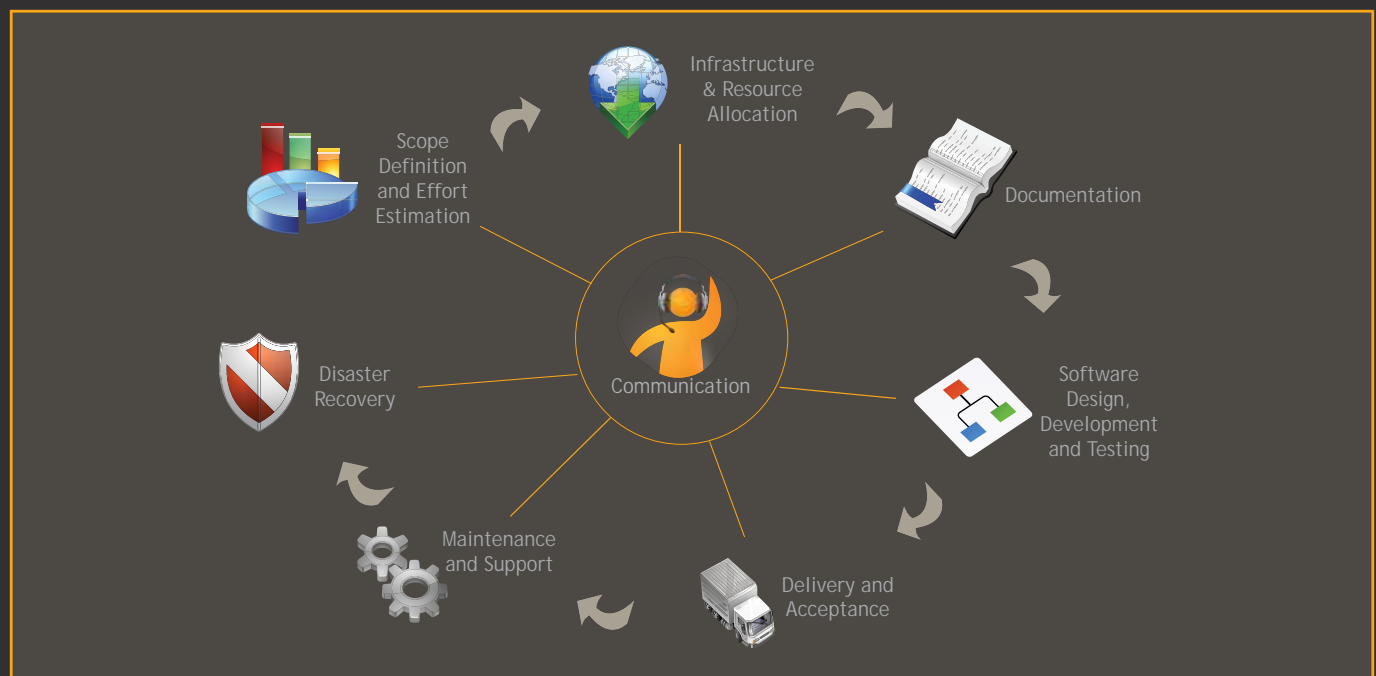

- Microsoft Dynamics SL to Microsoft Dynamics AX
- Microsoft Dynamics SL to Microsoft Dynamics NAV
- Microsoft Dynamics GP to Microsoft Dynamics NAV
- Microsoft Dynamics GP to Microsoft Dynamics AX

We've also done escalation on localisation and development projects for various Microsoft partners.

"Excellent execution job team! It is great to see these features released to the Microsoft Dynamics AX community. This further strengthens our Microsoft Dynamics AX story in India and the commitment to our customers."
