

The SAG Partner AdvantEDGE Program

The SAG Partner AdvantEDGE program provides Microsoft partners with an opportunity to expand their business and reduce their bottom-line.

Having provided services to Microsoft for about a decade on both core development and support, the SAG Partner AdvantEDGE program gives you the capability to provide the quality and support standards similar to Microsoft.

You can utilize our resources and extensive experience in the end-to-end process of functional specification designing - from feature analysis and designing to product presentations and training.

This is the perfect way for you as a Microsoft partner to focus on new business development while we take care of your business operations for you.

“Acquire the quality and standards of a team who does requirements gathering for Microsoft, scale up your business while providing quality support at lower costs...”

Experience & Knowledge

We have an experienced team of Functional analysts who are adept at Requirements writing as per Microsoft standards on Microsoft Dynamics. We have undertaken the following:

- Extensive experience in the end-to-end process of functional specification designing - from Feature analysis and designing to Product presentation and training
- Expertise in Business process analysis, Requirement gathering and Use case modeling
- Excellent product designing and functional specification documentation skills
- Specialised and in-depth knowledge base on the business and legal requirements
- Exposure on Microsoft Dynamics AX since 2004
- 100% certified on Microsoft Dynamics AX

I would like to congratulate the Dynamics team at Systems Advisers Group on the completion of the functional specifications for Axapta Localisation. This is really a commendable achievement considering the fact that 34 specifications covering 6 major Indian taxes were done.

I am confident that this quality of work generated by the team, will result to be the turning point for Axapta Localisation and help it gain a far greater share in the Indian market place.

All the very best for Microsoft Dynamics AX5.0 Features, GLS merge and Wave 2 Projects . I am positive that we will together challenge the "Challenge" and enhance the value of India localisation substantially.

Prabhat Bhargava
Program Manager
Global Development Localisation
Microsoft Corporation India (Pvt.) Ltd.

Key Work by Requirement Team

Microsoft Dynamics AX 2009

India localisation

- Feature impact study of the new features in Microsoft Dynamics AX 2009, and functional specifications for the re-engineering of these new features to India localisation (12 features)
- One of the re-engineering designs for India was identified as a global feature and functional specification documented for the global level development of this feature
- Export/Import [EXIM] requirements, extremely complex functionality for India, amounting to nearly 3 man-months work by the requirements team

Brazil localisation

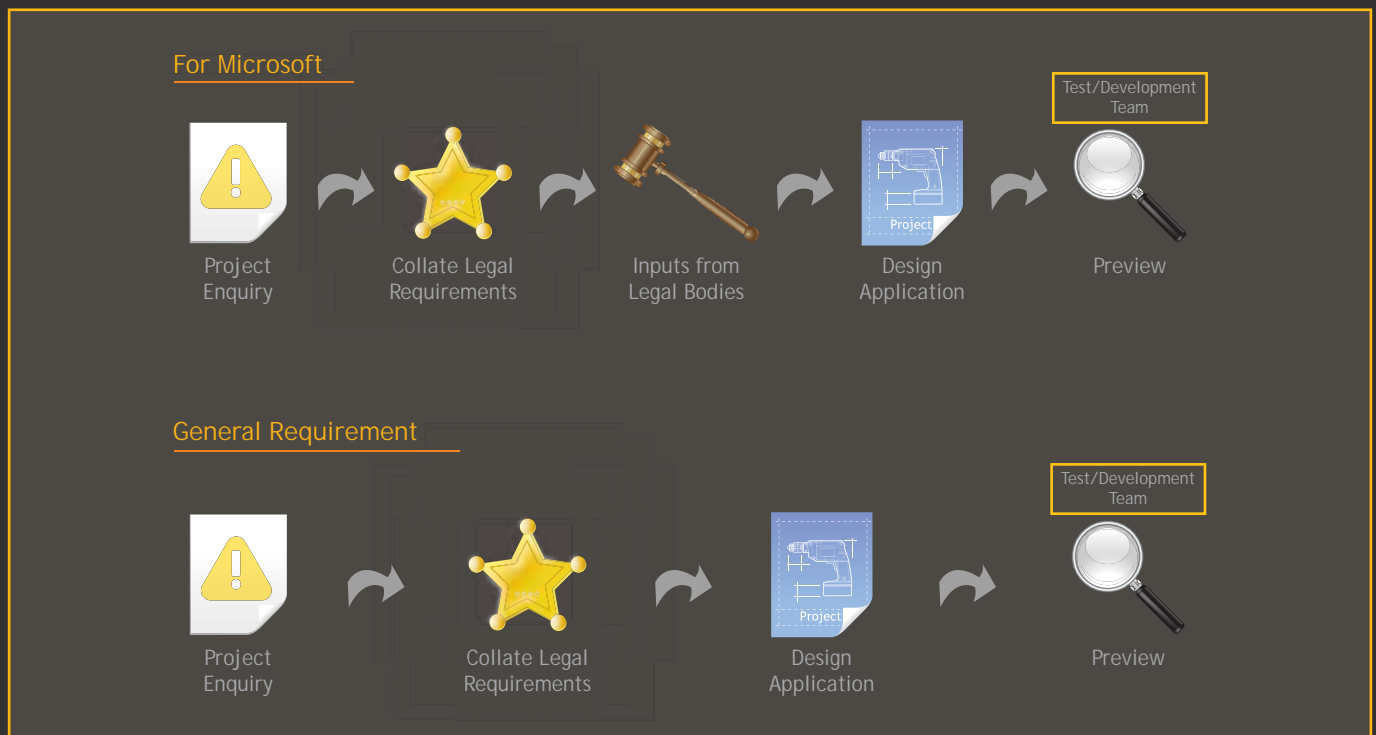

- Functional specifications for the re-engineering of new features in Microsoft Dynamics AX 3.0, 4.0 & AX 2009 (Key functionality added)

Microsoft Dynamics AX 4.0

India localisation - Tax rewrite project

- The existing features for India localisation were completely revamped and redesigned in-line with the core Microsoft Dynamics AX standard design, while retaining the essence of India business and legal requirements. The key features that form a part of the Tax re-write project are:
 - Indirect taxes - Central Excise, Custom, Service tax, VAT, Sales tax
 - Direct taxes - Tax Deducted at source (TDS), Tax Collected at source (TCS)
 - Other additional features - Tax calculation and financial posting in transfer orders, Depreciation as per Companies Act of India, Depreciation as per Income Tax Act of India, Modifications to financial reporting
