

The SAG Partner AdvantEDGE Program

The SAG Partner AdvantEDGE team consists of resources with rich domain knowledge, who have undergone intensive in-house training and are certified on different Functional modules of Microsoft Dynamics AX.

Extensive experience in end-to-end testing processes which involves Business scenario and application integration, Upgrade testing, security testing and use of Microsoft automation tools to optimize the testing time as well as to do a thorough regression time and again to make sure nothing breaks when new features and functionality is added.

Over the past 9 years, our test team has built considerable technical expertise and experience of handling various test automation tools & processes.

“Provide local support to your customers located across the globe...”

Experience & Knowledge

With in-depth knowledge on Microsoft Dynamics AX and Test Procedures & Microsoft Test Tools, they are very versatile in handling any Customisation, localisation and core Microsoft Dynamics AX work with rich domain expertise and good understanding of business processes.

Key Process Test process handled by the test team when testing existing and new features for Microsoft Dynamics AX:

- Review of the functional specifications
- Creating test designs & test cases (Methodology of test approach)
- Manual/Automation testing, Upgrade, Multi User, Integration & Performance testing
- Configuration & Parameter testing (to avoid Multi-company/country conflicts within the same application)
- Security testing
- Batch Posting (transactions on a weekly/ monthly basis on a scheduled time through a batch server)
- Scorecard Testing (Testing important scenarios before the code is checked into the build process).

- Automation of test cases - to avoid repetitive testing
- Test services - a wrapper that wraps all test cases and executes them one by one

I would just like to add my thanks and appreciation on this magnificent delivery. Microsoft Dynamics AX 5.0 features, GLS merge, Wave 2 Projects and the localisation are being very well received and the functionality available is beyond expectation. I know 2007 was a very hectic year for the team and that designing the new localisation from scratch was a huge challenge but you were all up for it!

Congratulations to the whole team! A truly fantastic achievement by you all! I look forward to successful India localisation deliveries going forward.

Janine O'Shea
Lead Program Manager - EMEA & India
Global Development Localisation Team
Microsoft Corporation

Key Work by Test Team

Microsoft Dynamics AX 2009

SYS Layer:

- End-to-end testing for Australia & New Zealand - 120 test cases - up to Test Scheduler and Weeklies
- Application testing for WEMEA - 13 RegF
- Application testing for Thailand and Japan

GLS Consolidation:

- End-to-end testing for Indian Localisation - GLS Consolidation project
- Testing of over 1000 test cases manually
- End to end testing for Japan, Thailand and India

Upgrade Testing:

- Upgrade testing done both in Oracle and SQL for Japan, Thailand and Indian Localisation
- Version's 3.0 to Microsoft Dynamics AX 4.0
- Version's 4.0 to Microsoft Dynamics AX 2009

Other tasks taken up:

- Demo Data Preparation for Microsoft - UK, India

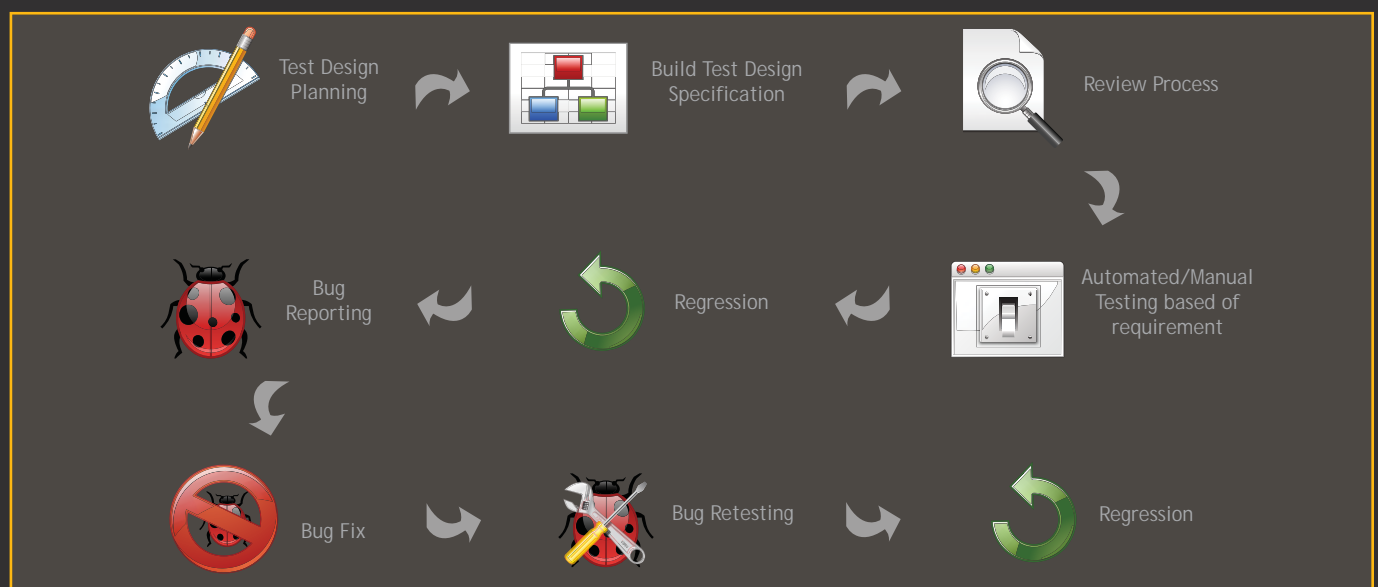

- AXU - Rewrite of Case study based course material for key modules of Microsoft Dynamics AX
- Functional reviews of Content Documents for Microsoft Dynamics AX 2009 - Brazil & India
- Sustained Engineering - Testing for India, APAC, EE
- Microsoft Support for EMEA - 1st level support since May 2008

Microsoft Dynamics AX 4.0 and earlier

Delivery of quality features for:

- Brazil Localisation
- APAC Localisation testing for Japan, Thailand, Malaysia, Singapore, Australia and New Zealand
- India Localisation regulatory features for Microsoft Dynamics AX 3.0 & Microsoft Dynamics AX 4.0
- India Tax re-write for Microsoft Dynamics AX 4.0 SP2
- Spain features on Microsoft Dynamics AX 3.0 SP6 & Microsoft Dynamics AX 4.0 SP2
- Regulatory features for UK, Czech Republic and Hungary
