

The SAG Partner AdvantEDGE Program

With over 18 years of experience and more than 150 implementations, the SAG Partner AdvantEDGE team is among the most experienced Global Microsoft Dynamics solutions providers across the world. Our clients today are continuously looking for ways to leverage their technology investments to optimize business value.

They face various challenges from lack of in-house skills, especially in upgrading the organisation specific customizations or coping with separate technology upgrade cycles of multiple vendors.

With its established practice in Microsoft Dynamics coupled with functional and technical expertise, we offer Microsoft Dynamics partners services that help smoothen this transition - cost effectively and with minimum disturbance to the existing operations. Our process centric approach eliminates the risk factor in outsourcing while at the same time allowing the client to leverage the cost advantage of outsourcing their ERP solution development.

“Reduce your resource allocation costs and improve efficiency while scaling up business...”

Experience & Knowledge

- Extensive experience working with Microsoft Dynamics AX 2.5, 3.0, 4.0 and AX 2009 allowing to successfully manage upgrades to newer versions of Microsoft Dynamics AX.
- Currently involved in development projects for Axapta 3.0, Microsoft Dynamics™ AX 4.0 as well as for Microsoft Dynamics AX 2009 on behalf of Microsoft.
- Our Microsoft Dynamics AX experts are among the most experienced certified Microsoft Dynamics Axapta developers and consultants available anywhere.
- Our consultants and developers have wide-ranging domain experience with ERP applications including supply chain, finance, and distribution.
- Utilisation of global delivery model - project management is local while we still leverage our skilled offshore development team in India.
- We have a set of upgrade tools that allows us to quickly and accurately complete upgrades for our clients.
- Process Maturity - Proven methodologies for Microsoft Dynamics AX development, implementation support, and upgrade services.
- QA is based on our application development experience for Microsoft that follows a strict adherence to quality standards, resulting in higher overall product quality for our clients.
- We have extensively also handled and completed partner led upgrade services. The advantage a partner has is by doing so, we serve the partners without affecting their interests and while focusing on huge cost advantages.

Key Work by Upgrade Team

- Version upgrade for localisation code for India and APAC countries, Brazil etc
- Numerous Onsite/offshore upgrades for multinationals across the globe.

Systems Advisers Group put us at ease within the first few meetings with their deep knowledge and expertise on the offshore upgrade process.

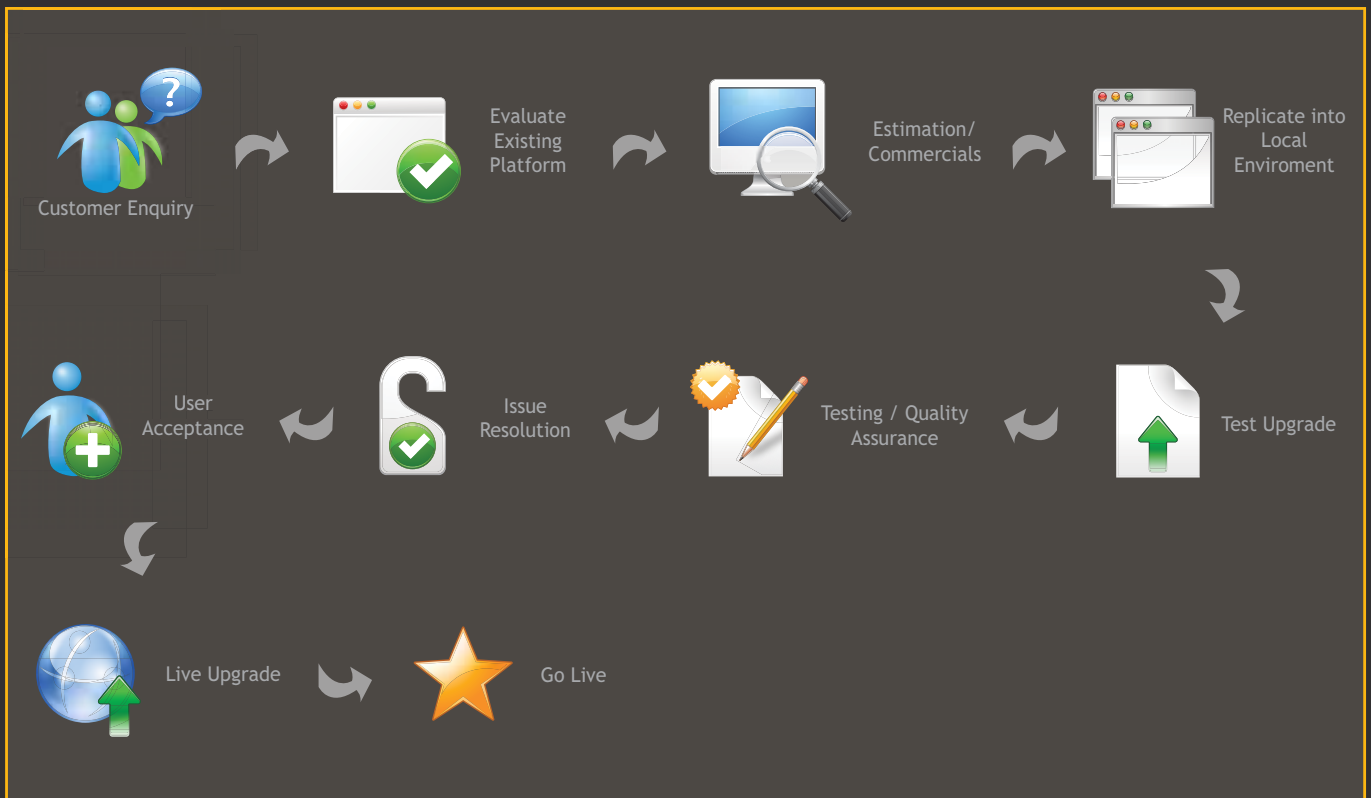

Gert Neetesonne
Operations Manager
Edan (MBS Partner)

Systems Advisers team has provided us with excellent service during our recent Microsoft Dynamics AX implementation. They are qualified consultants who have demonstrated their in-depth understanding of Microsoft Dynamics AX and their domain knowledge in our industry.

With their commitment to our project, we have upgraded to the latest version 4.0 on time and on target. Now that Microsoft Dynamics AX is better adapted to our needs, we intend to continue working with the Systems Advisers Group team to extend our use of the product in the coming financial year.
